

Get Your Team Talking About Usability

Beth Tucker Long
@e3betht

Beth Tucker Long

- PHP Developer
- Stay-at-home Mom
- User Group Leader
- OSMI volunteer

Audience Participation?

- Yes, there will be. So, when I ask the audience a question, don't be shy about answering.

What is Usability?

What is Usability?

According to Wikipedia:

Usability is the ease of use and learnability of a human-made object.

According to Beth:

Usability means structuring things so you don't leave your users angry, frustrated, and complaining about you on Facebook or Twitter.

Let's Try Something

Questions for your Team

Getting Started

- Who are your users?
- What do you want them to do on your site?
- What do they want to do on your site?
- How tech-savvy are your users?
- Where will your users go if your site isn't working for them?

Start with discussing common problems

Common Problems

Be Forgiving and Empowering

- Everyone makes mistakes, so every mistake should be fixable.
- The user should control the system. The system should not control the user. The user is the boss and the system should show it.
- User should be able to do what they want.
- Alert users to an error before things get worse.
- Strive to empower the user, not speed up the system.

Common Problems

Unicorn Puke

Just Don't.

Things that look the same should act the same.
Things that look different should act differently.

Common Problems

Pizza Size:

- 12"
- 18"
- 24"

Pizza Crust:

- Joe's Specialty
- The Original
- The New Original

Common Problems

Lost in Translation

The information for the decision must be there when the decision is needed.

Make sure you are using the language of your users.

Common Problems

Pizza Size:

- 12" (feeds 1-2)
- 18" (feeds 2-3)
- 24" (feeds 3-4)

Pizza Crust:

- Joe's Specialty

Hand-tossed with cheese baked into the crust.

- The Original

Traditional thin crust.

- The New Original

Our traditional thin crust, now with special seasoning baked in.

Have some fun!

Lake & Pond Management
Stormwater Harvesting & Storage

A Design and Consultancy Business

Water Equipment Technology is a professional company that offers critical support in harvesting, storing and the efficient application of your water supply.

Our business strategy is Sustainable Water Management Solutions

A Sustainable quality water supply is the life blood of any Agricultural Property, Horticultural Garden or Sporting Arena. This day and age, such irrigators must have their own water supply complete with a water usage management plan to guarantee themselves of an uninterrupted sustainable water supply.

Annual Meeting 2015

Our 2015 Annual Meeting will be held on April 11th, 2015 at Capital University. As the agenda is set, and Call for Papers is posted, information will be available [here](#).

THE OHIO ACADEMY OF SCIENCE

WELCOME / SCIENCE DAYS / PROGRAMS / SUPPORT OAS / SPONSORS AND INSTITUTIONAL MEMBERS / STORE / CONTACT

The Ohio Academy of Science was founded in 1891 to promote science and science education in Ohio. The Academy conducts numerous pre-college student-programs to encourage STEM education and to provide a venue where student-scientists can interact with other students and scientists from across Ohio. In addition, OAS hosts an Annual Meeting and publishes a scientific journal *The Ohio Journal of Science* that focuses on the science being done in Ohio, as well as the science that is directly impacting Ohio.

Please join us in our 125th year of supporting science and science education in Ohio.

Recap

- **Typing Practice** – Don't delete good information
- **Sneak Attack** – Be clear on what is missing
- **Button Roulette** – Keep buttons consistent
- **Too Many Cooks** – Make the path obvious
- **Cliff Notes** – Make the content scannable
- **Unicorn Puke** – Pick a color and stick with it
- **Great Expectations** – Same cause, consistent effect
- **Lost in Translation** – Use the user's language

Read This Later

Lund, A. M. (1997). Expert ratings of usability maxims. *Ergonomics in Design*, 5(3), 15-20. A study of the heuristics design experts consider important for good design.

When evaluating the design and usability of a website, consider the following:

1. Know the user, and You are not the user.
2. Things that look the same should act the same.
3. The information for the decision must be there when the decision is needed.
4. Error messages should actually mean something to the user and tell the user how to fix the problem.
5. Every action should have a reaction.
6. Everyone makes mistakes, so every mistake should be fixable.
7. Don't overwhelm the user.
8. Consistency, consistency, consistency.
9. Minimize the need for a mighty memory.
10. Keep it simple.
11. The user should always know what is happening.
12. The more you do something, the easier it should be to do.
13. The user should control the system. The system should not control the user. The user is the boss and the system should show it.

Read This Later

14. Eliminate unnecessary decisions and illuminate the rest.
15. The best journey has the fewest steps. Shorten the distance between the user and the goal.
16. User should be able to do what they want.
17. Alert users to an error before things get worse.
18. Users should always know how to find out what to do next.
19. Strive to empower the user, not speed up the system.
20. Things that look different should act different.
21. These are presented in a descending order determined by their mean rating of importance.
