Getting Kids Involved in Programming

Beth Tucker Long

@e3betht

Beth Tucker Long

- PHP Developer
- Stay-at-home Mom
- User Group Leader
- Mentor & Apprentice

@e3betht

Why?

- Improve math skills

- Improve problem solving skills

- Improve computer skills for school

- Improve job skills

- Creative outlet

- Understand what goes into making every day things

@e3betht

Why not?

"Today's artificial intelligence software is powerful enough to create other A.I. software – which means it won't be long before we replace coders with code that codes."
--Andrew Nusca, *Teaching Kids to Code is Overrated*

@e3betht

Format

Infants and Toddlers

Exploring New Toys

- Encourage independent exploration

- Teach new uses one at a time

- Introduce the idea that pushing buttons makes something happen

@e3betht

Pre-readers

Jokes and Riddles

- Finding multiple uses for things
- Finding discrepancies in logic
- Finding patterns in language

@e3betht

Trouble-shooting Stories

- Start a story
- Introduce a problem
- Turn the story over to them to solve it
@e3betht

Fisher Price Code-a-pillar

Teaches:
1. Using symbols to program actions
2. Order of actions

Cubetto

Teaches:
1. Sequencing
2. Patterns
3. Computational thinking

@e3betht

Robot Turtles

Teaches:
1. Using symbols to program actions
2. Order of actions
3. Reusable Functions
4. "Running" your script

@e3betht

Code & Go Robot Mouse

Teaches:
1. Using symbols to program actions
2. Order of actions
3. Running your script

@e3betht

Hello Ruby

Teaches:
1. Computational thinking
2. Sequencing
3. Patterns recognition
4. Loops

@e3betht

Ozobot Bit

Teaches:
1. Sequencing
2. Patterns
3. Computational thinking

@e3betht

Cubelets

Teaches:
1. Sequencing
2. Patterns
3. Computational thinking

@e3betht

Botley

Teaches:
1. Sequencing
2. Patterns
3. Looping
4. Computational thinking

@e3betht

OSMO Coding Blocks

Teaches:
1. Using symbols to program actions
2. Order of actions
3. Number of repeating actions
4. "Running" your script

Walk down 3

Walk right 2

Run

@e3betht

Reading

Blockly

- Block programming

- Outputs code in many languages

- Browser-based or built into many apps

@e3betht

Scratch

- Block programming

- Designed for ages 8-16

@e3betht
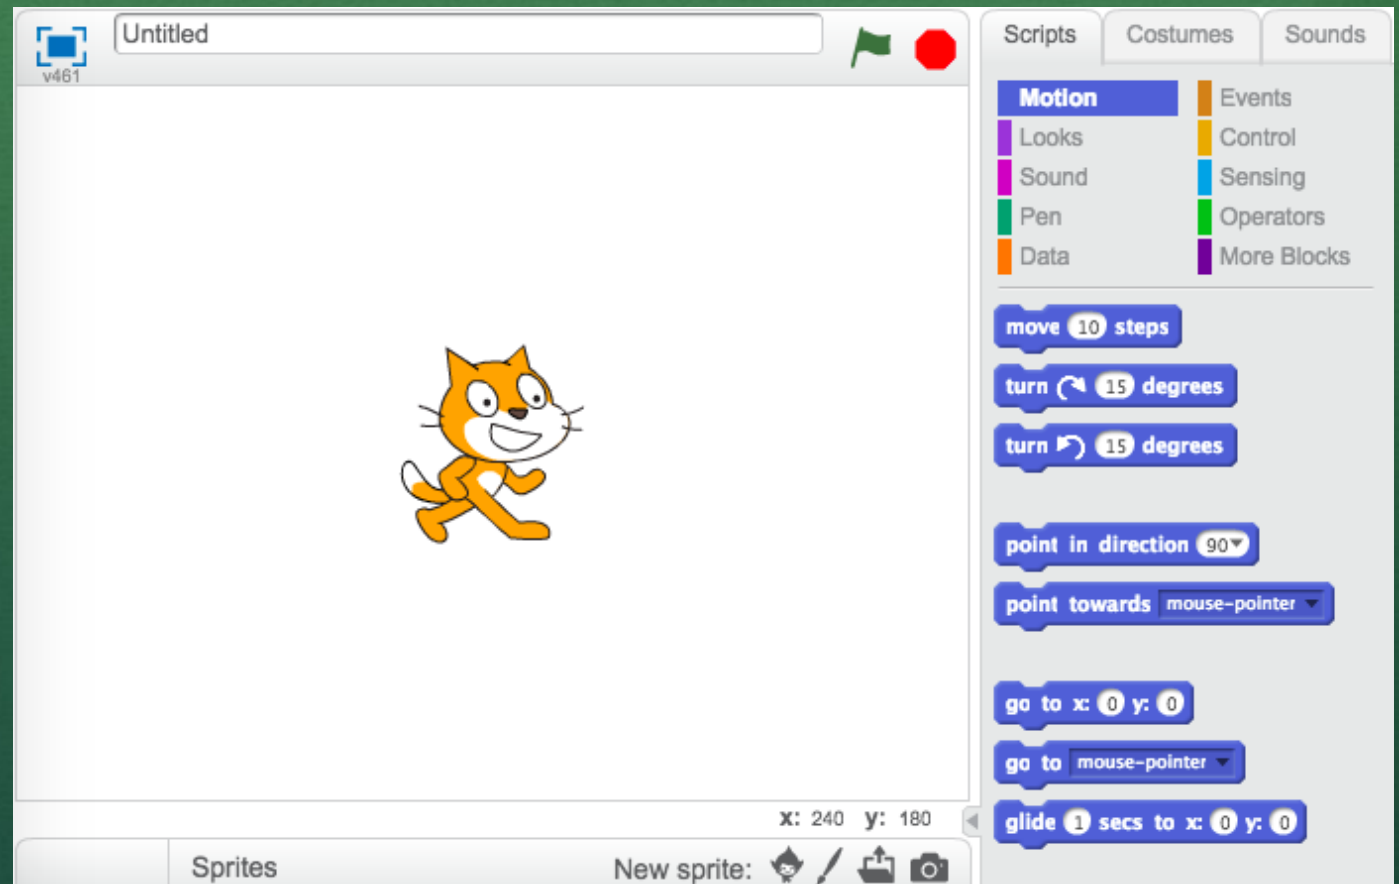

ScratchJr

- Block programming

- iPhone/Android app

- Designed for ages 5-7

Snap Circuits Jr.

Teaches:
1. Following flow
2. Making sure redundancies are included
3. Following patterns
4. Debugging

Ozobot Evo

Teaches:
1. Sequencing
2. Patterns
3. Computational thinking
4. Block programming

@e3betht

Sphero

Teaches:
1. Intro block-based programming
2. Interacting with hardware components
3. Programming movement

@esbetht

Wonder Workshop Dot

Teaches:
1. Intro block-based programming
2. Interacting with hardware components

@e3betht

Wonder Workshop Dash

Teaches:
1. Intro block-based programming
2. Interacting with hardware components
3. Programming movement

Wonder Workshop Cue

Teaches:
1. Intro block-based programming
2. Interacting with hardware components
3. Programming movement

@e3betht

Photon

Teaches:
1. Intro block-based programming
2. Interacting with hardware components
3. Programming movement

@e3betht

Tinker Crates

Teaches:
1. Mechanics
2. Electricity
3. Physics
4. Math
@e3betht

Breaking Box

Teaches:
1. Creativity
2. How things work
3. What's inside
4. Why things break

@e3betht

Makey Makey

Teaches:
1. Using programming with every day objects
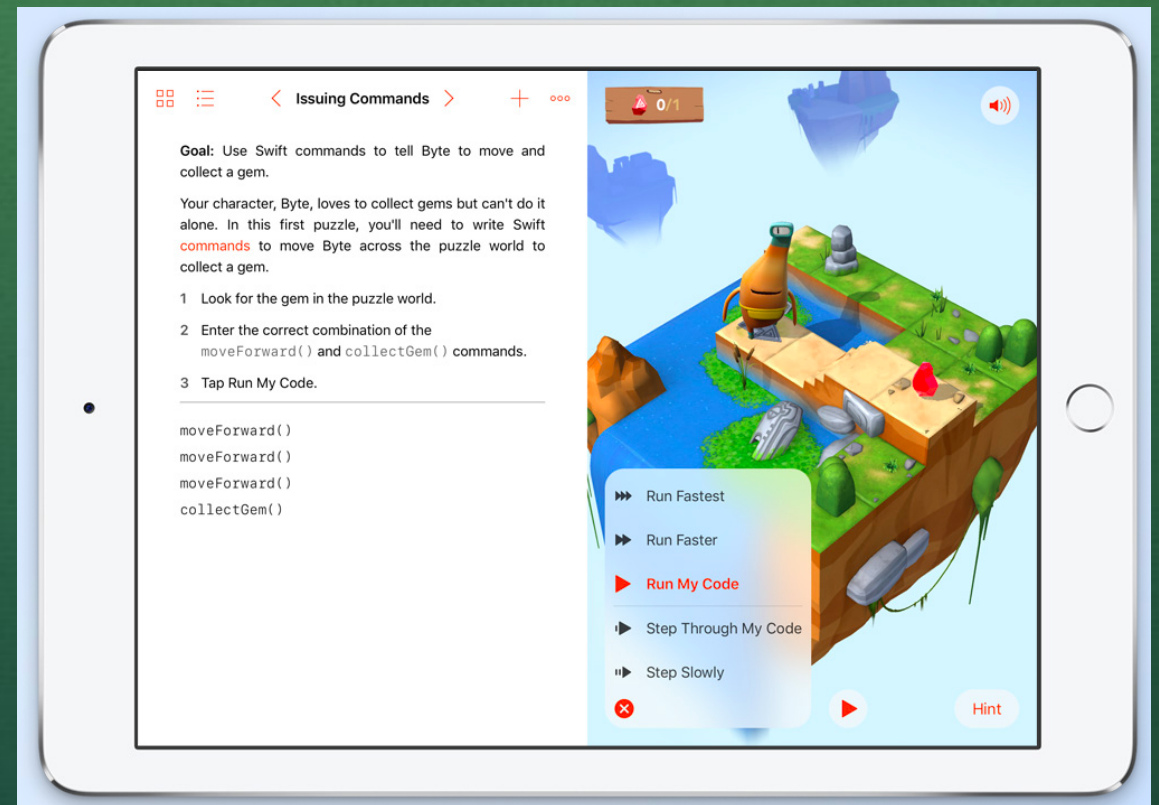

Hopscotch

Teaches:
1. Block-based programming
2. Object-oriented programming
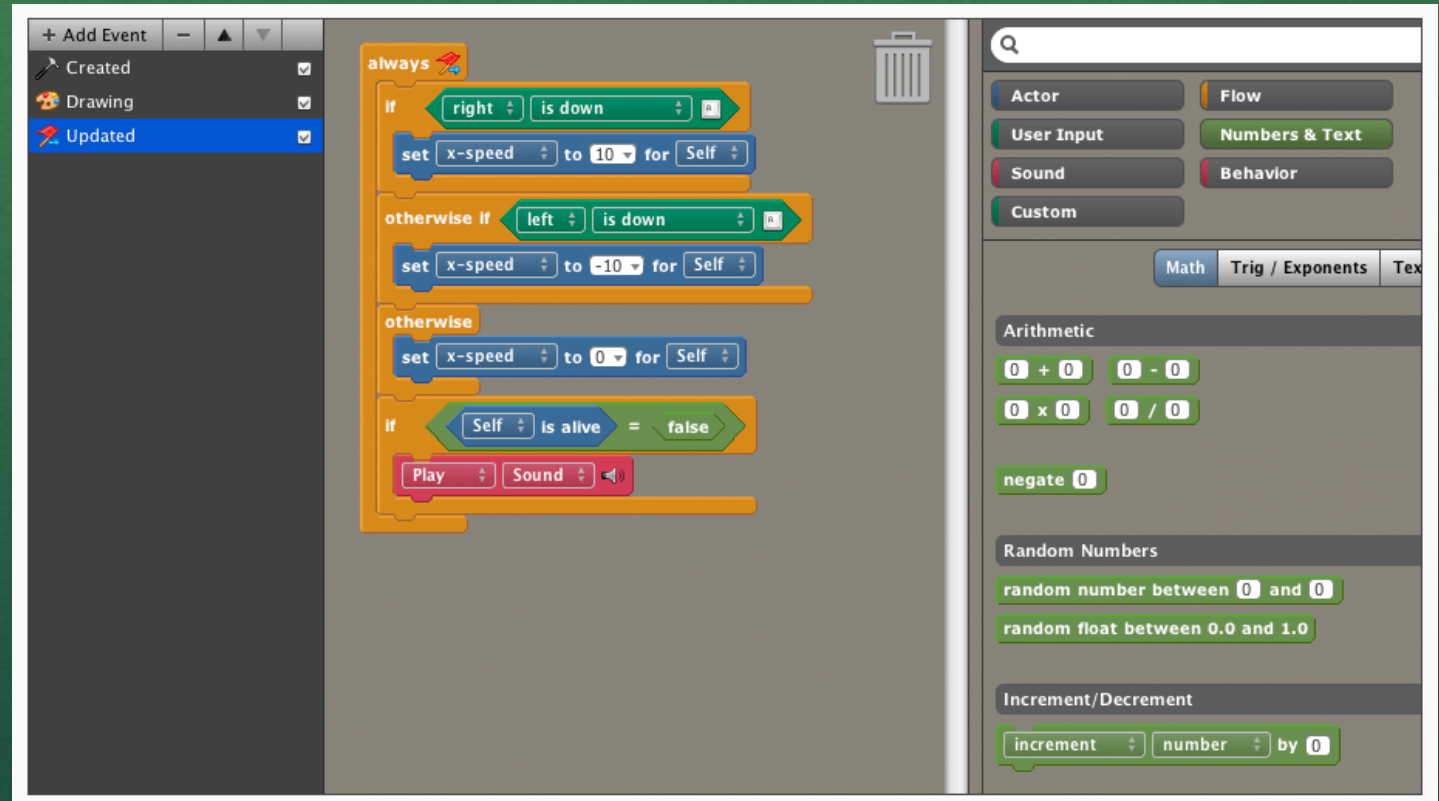

Swift Playgrounds
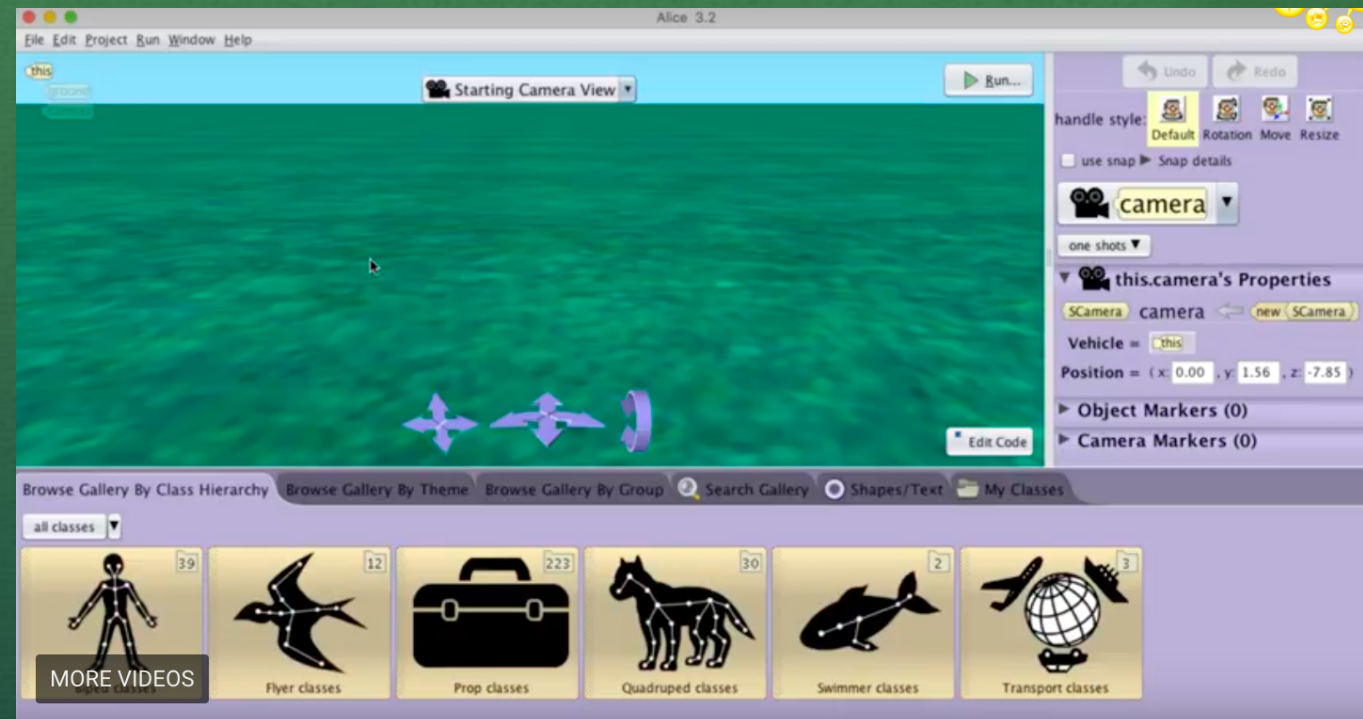

Teaches:
1. Mobile-based development

Stencyl

Teaches:
1. Block-based programming
2. Mobile phone development

@e3betht

Alice

Teaches:
1. Block-based programming
2. 3D environment programming

@e3betht

# Raspberry Pi

Teaches:
1. Everything computing – inside and out

Online Resources

@e3betht

Code.org

- Online Computer Science and Internet Safety Courses (Free)
- Has Programs for K through High School

https://code.org

@e3betht

Tynker

- Online Computer Programming courses
- Elementary School level (7+)

https://www.tynker.com
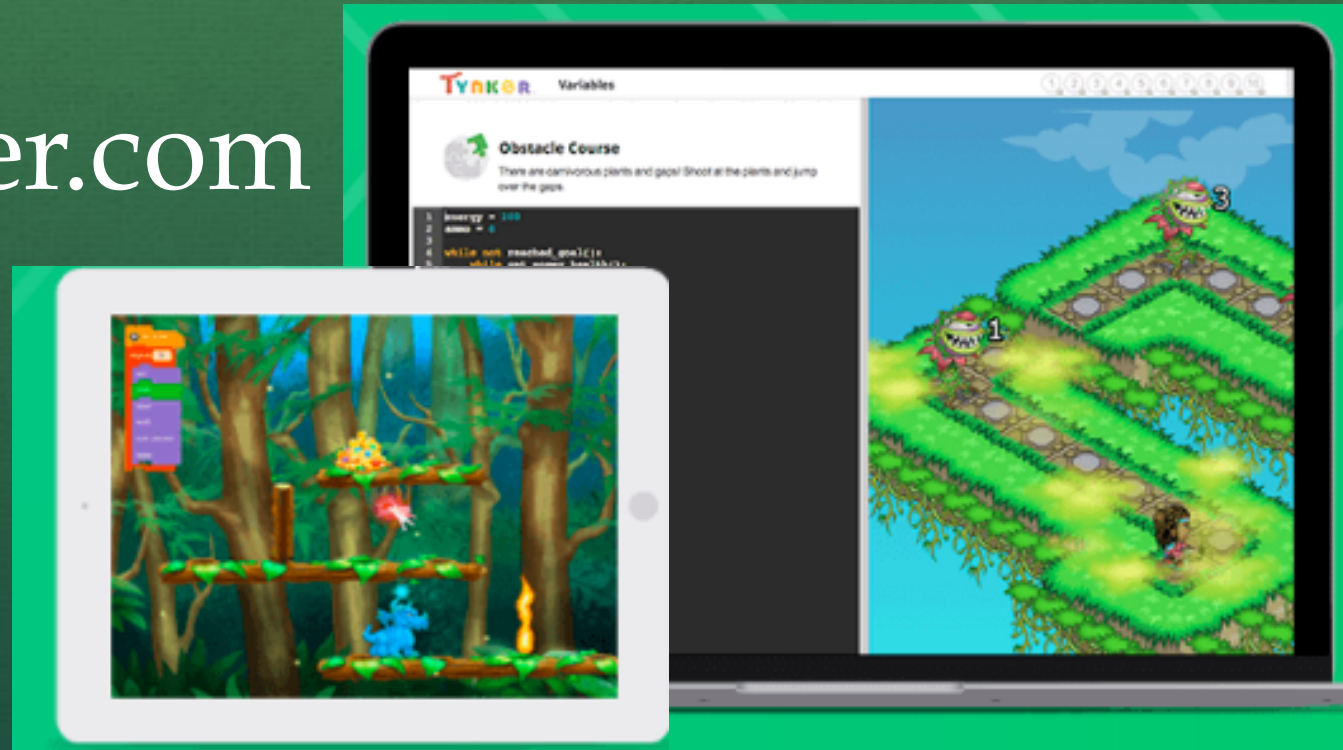

Kodable

- Games and activities (free)
- Ages 4 -10

https://www.kodable.com

@e3betht
More Online Options

- Code Avengers
- Code Combat
- Code Monster
- CodeAcademy
- Codemoji
- Khan Academy

@e3betht

In-person Resources

@e3betht

CoderDojo

- Live courses on a variety of topics
- Ages 7-17

https://coderdojo.com

@e3betht

Girls Who Code

- Clubs, courses, and camps
- Grades 3-12

https://girlswhocode.com

ScratchJr Family Days

- One day event for families

https://www.scratchjr.org/outreach/about

User Groups and Maker Spaces

https://www.meetup.com/

Upcoming Projects

Code Monkey Island

- Board game to teach programming concepts like Boolean operators, condition statements, and more.

@e3betht

Project Bloks

- Development Platform for creating new teaching tools

https://projectbloks.withgoogle.com/

@e3betht
AlgoBrix

Teaches:
1. Using symbols to program actions
2. Order of actions
3. Number of repeating actions
4. Functions with parameters
5. Conditional statements
Kano Harry Potter Wand

Teaches:
1. Using symbols to program actions
2. Programming hardware components
3. Loops
4. Variables

Resources
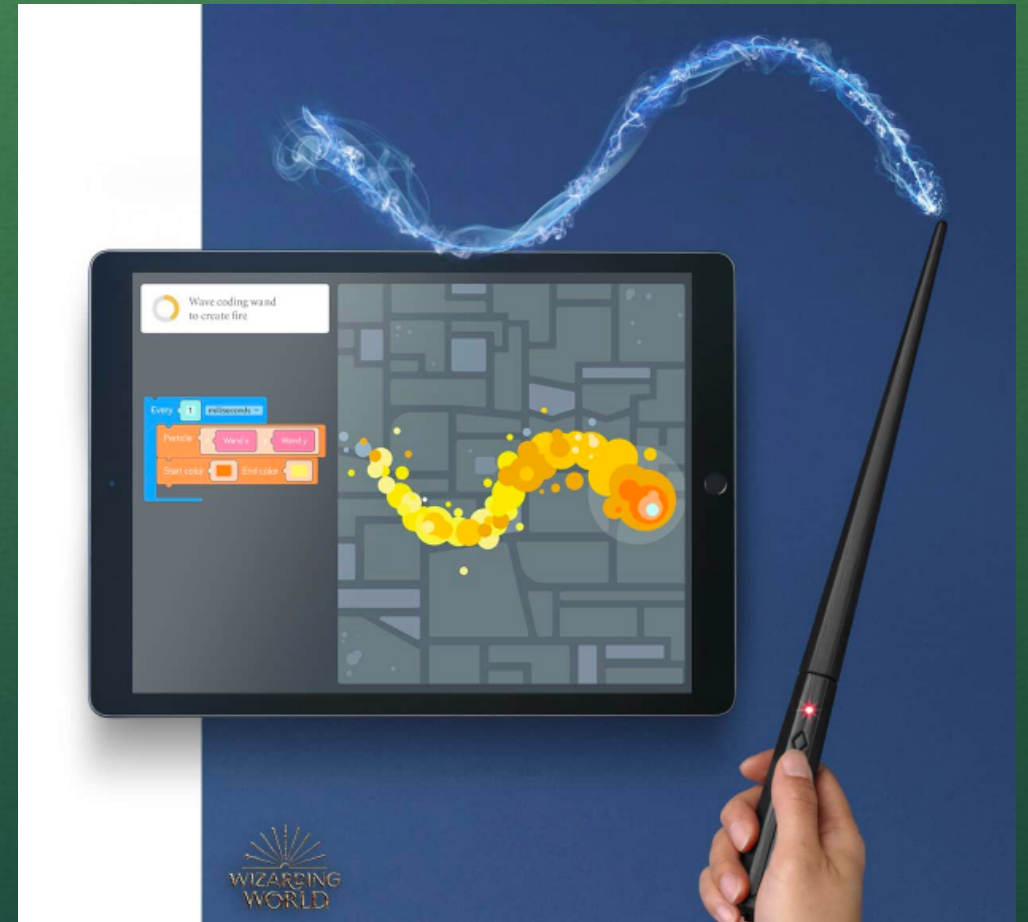

1. AlgoBrix - http://www.algobrix.com/
